

CIVIC & GLOBAL ENGAGEMENT

The Division of Civic and Global Engagement develops, implements, and champions opportunities for connections with the world beyond campus. Our approach and activities emphasize global interconnectedness and the active pursuit of the world in which we want to live.

We will continuously assess our attention to the following six priorities:

- Emphasize JEDI principles, anti-racist action, and global interconnectedness in all our work.
- Offer students vigorous learning, community-building, and leadership opportunities, including hands-on experiences beyond the campus.
- Offer students reliable, personalized advising in a welcoming environment.
- Develop, implement, and champion opportunities for global engagement, including domestic and international study away and support for international students.
- Develop, implement, and champion opportunities for local community engagement and civic action, including partnerships with not for profit organizations.
- Adapt as necessary to advance institutional priorities and to optimize organizational effectiveness.

Having participated in our programming, students should report or demonstrate:

- an increased sense of belonging,
- a more nuanced global mindset,
- an increased sense of their agency to affect positive change.
